

Community Event & Partnership Portal

Complete User & Operator Manual

This manual covers every public, staff, and admin feature of the platform — from buying a ticket to running the Special Event Permit fee schedule.

Audiences: Community members · Staff · Admins

GETTING STARTED

Platform Overview (Community)

The Community Event & Partnership Portal is the city's one-stop platform for discovering events, booking municipal rooms, applying as a performer, vendor, sponsor, or community organization, and (for city staff) running every operational side of the program.

Your view depends on your role **and** which department you are currently acting in:

- **Community members** browse events, buy tickets, book rooms, and apply to programs across departments.
- **Staff** see an Event Ops sidebar scoped to their active department.
- **Dept admins & Super admins** additionally manage department settings, branding, room policies, user roles, and which platform modules are turned on.

GETTING STARTED

Accounts & Logging In (Community)

One account works across every program. You can be a ticket-buyer, musician, org admin, vendor, and permit applicant under the same login.

- 1 Sign up or log in**
Click **Log in** in the top-right. New users tap *Sign up* to create an account with email and password.
- 2 Land on your Hub**
After signing in you arrive at your personal hub showing everything you can do.
- 3 Add more roles over time**
Apply as a musician, register a community org, or submit a vendor / permit application from the Hub — all under the same login.

GETTING STARTED

Your Personal Hub (Community)

The Hub at /hub is your home screen once you're signed in. It groups everything you can do into three areas: **Apply / Add a new role**, **Do something**, and **Manage your stuff** (tickets, reservations, gigs,

organizations, permits). Each card only appears if the underlying module is enabled.

TIP You can re-order or hide entire Hub sections from the **Customize** toolbar — your layout is saved per device.

COMMUNITY

Browsing & Buying Tickets (Community)

The public /events page lists upcoming events with image, date, venue, and a quick-buy button. Each event page shows a map, schedule, sponsors, and a ticket purchase panel. Tickets purchased online appear under **My Tickets**; a QR code is used at the gate.

COMMUNITY

Booking a Room (Community)

- 1 Filter to the right room**
Filter by venue, minimum capacity, and tags (Power, Projector, TV, ...). Filters are remembered in the URL.
- 2 Pick a room**
Each card shows photo, capacity, building, and address. Click for details.
- 3 Choose a time**
The detail page shows a live 7-day availability calendar.
- 4 Accept the departmental room policy**
Before submitting, a modal shows the room policy set by the owning department. You must tick '*I agree to this departmental policy*'.
- 5 Instant-book or pending**
If the room is marked **instant-bookable**, the reservation is approved immediately and you receive a confirmation email. Otherwise it joins the department's pending queue.

HEADS UP For non-instant rooms, submitting does **not** guarantee the booking until staff approve it. The policy you agreed to is recorded with your request.

COMMUNITY

StreetBeats (Musicians) (Community)

StreetBeats lets approved musicians claim open busking slots at city venues. **One account can hold up to 10 artist profiles** — perfect for solo acts who also play in bands, or for managers handling several performers.

- 1 Create your first artist profile**
Fill in stage name, genre, bio, photo, and social / tip links.
- 2 Add more profiles if you wear multiple hats**
Each is reviewed and approved independently.
- 3 Wait for approval**
Staff review each artist and notify you by email.
- 4 Claim a slot — and pick which artist**
If you have multiple approved profiles, a dialog asks which one is performing this gig.
- 5 Release if your plans change**
From *My Gigs*, hit *Release* to free the slot.

TIP Each artist profile gets its own shareable page at `/artists/<id>` with upcoming gigs, social links, and tip jar.

COMMUNITY

Community Organizations (Community)

HOAs, nonprofits, and schools register at `/community/apply`. One account can manage multiple organizations from `/community/manage` and submit community events on behalf of each.

COMMUNITY

Vendor Applications (Community)

- 1 Sign in to the vendor portal**
Go to `/vendor` and create an account if needed.
- 2 Apply for events open to vendors**
Pick an event, choose a booth tier, and submit your business profile.

- 3 **Tell us about your sales & licensing**
The application asks: **Will you be selling items?** If yes, describe the products. **Are you licensed to do business and sell items?** If yes, upload one or more proofs (sales-tax permit, health permit, business license, food handler cards). **Special requirements** — electrical, water, vehicle drop-off, allergens, accessibility.
- 4 **Wait for staff approval**
Staff review your application and supporting documents before any payment is collected.
- 5 **Review the contract and pay**
Once approved, an in-app payment panel shows tier, amount due, and the full **Vendor Agreement**. You must tick '*I have read and agree to the contract terms*' before Submit Payment enables. Card details are captured on the same screen.
- 6 **Manage booth placement**
After payment clears, your booth assignment and event-day logistics appear in the vendor dashboard.

TIP Uploaded permits are stored privately in the vendor-permits bucket and are only visible to you and reviewing staff.

COMMUNITY

Becoming a Sponsor (Community)

Browse current partners at /sponsors and click *Become a Sponsor*. Sponsorship applications use the same /vendor portal — pick the event, choose a sponsorship tier (which controls logo placement, mentions, and benefits), and submit for staff review.

After approval, the same payment + contract panel opens. You'll see your tier and price, the full **Sponsorship Agreement**, and must check '*I have read and agree to the contract terms*' to authorize the charge. Your logo then appears on the event page and flyers.

COMMUNITY

Special Event Permits (Community)

Anyone planning a public event that needs city approval (parades, festivals, runs, block parties, ...) applies online at /events/permits/apply. The form is a guided 5-step wizard with dynamic pricing and in-app payment.

- 1 **Applicant & Event Basics**
Primary contact, organization, event name, estimated participants, and event type (drives the base fee).
- 2 **Dates, Times & Logistics**
Setup, main, and teardown windows; alcohol (with TABC license number), food vendors, electrical service, parade route.
- 3 **Operations & Safety**
Narrative answers for traffic control, litter control, and how you'll notify nearby residents and businesses.
- 4 **Document Uploads**
Required: certificate of insurance, site plan, and traffic management plan. Files are stored privately in the permit-docs bucket and only visible to you and staff reviewers.
- 5 **Fees, Signature & Payment**
The wizard adds the active base fee + your chosen route/trail option fee in real time. After typing your name to certify, the same USAePay checkout used for vendor booths opens. On a successful charge the permit is marked **paid** and sent to the staff review queue.

TIP Hit **Save Draft** at any time. Drafts are kept in your account and can be resumed from /my-permits or the *My Permits* card on your Hub.

COMMUNITY

My Permits (Community)

/my-permits lists every Special Event Permit you've started or submitted, along with its status:

- **Draft** — saved but not submitted. *Resume* reopens the wizard; trash deletes.
- **Pending review** — sent to staff; you can view your answers and the calculated fee.
- **Approved** — staff have approved; the wizard will let you complete payment.
- **Paid** — payment captured; the city has your certificate on file.
- **Rejected** — see staff notes for why; start a new application if needed.

NOTE You can also reach this page from *My Permits* in the 'Manage your stuff' section of your Hub.

STAFF

Staff Portal Overview (Staff)

The staff portal at /staff has a dark Event Ops sidebar with every operational area you can access (items only appear if you have permission for them):

- **Events** — Master Schedule: create, edit, and CSV-import events.
- **Venues & Stages** — manage locations, stages, and rooms.
- **Box Office** — attendees, check-ins, and ticket sales.
- **Vendors / Sponsors** — review applications and assign booths.
- **Community Music / Orgs / Events** — approve and schedule.
- **Room Reservations** — approve, decline, or reschedule requests.
- **Classes** — manage the class catalog and registrations.
- **Social Command** — multi-channel social publishing and connections.
- **Platform Settings** — your profile and operational settings.

NOTE Special Event Permits are reviewed by admins under *Admin* → *Permit settings*.

STAFF

Approvals Workflow (Staff)

Application types share the same review pattern: open the queue, review the submission, then approve, reject, or request changes. Approving a vendor / sponsor unlocks the applicant's payment panel; approving a room reservation sends a confirmation email.

ADMINS

Managing Staff Accounts (Admin)

Admins manage staff from /staff/admin:

- **Invite a new user** — sends an email with sign-up link and assigns the chosen role.
- **Promote existing user** — grant staff or admin to someone with an existing community account; no email sent.
- **Bulk invite** — paste a list of emails to onboard several staff at once.
- **Edit / Delete** — change profile, email, department membership, or remove the account entirely.

HEADS UP Be careful with the **admin** role — admins can change permissions, modules, and other admins.

ADMINS

Granular Permissions (Admin)

Open *Manage permissions* from the admin header. Each staff member has a row; click to open a drawer with two tabs:

- **Global** — checkbox grid of every permission (sidebar pages and event-dashboard tabs). Applies to all events.
- **Per-event** — pick an event and override permissions with grant, revoke, or inherit.

NOTE Admins implicitly have every permission. Permission changes take effect on the user's next page load.

ADMINS

Platform Modules & Settings (Admin)

Every major feature has its own toggle so you can phase rollouts or pilot a single program. Current modules:

- **Events** — public events directory & ticketing.
- **Venues & Stages** — venue/stage directory and editor.
- **Box Office** — attendee management and check-in.
- **Vendors / Sponsors** — applications, contracts, payments.
- **StreetBeats** — musician roster and gig claiming.
- **Community Orgs & Events** — HOA / nonprofit submissions.
- **Room Reservations** — booking flow and instant-book toggle.
- **Classes** — class catalog and registration.
- **Social Command** — multi-channel social publishing.
- **Special Event Permits** — the 5-step wizard, *My Permits*, and the staff review queue.

NOTE Disabling a module hides it from public nav, the Hub, and the staff sidebar. Existing data is preserved — modules can be re-enabled at any time.

ADMINS

Permit Settings & Fee Schedule (Admin)

The *Permit settings* link on `/staff/admin` opens the Special Event Permit configuration page at `/staff/admin/permits`. Admins control two things here:

- **Fee schedule** — three categories: *Event types* (radio choices in step 1), *Route / Trail fees* (route options in step 5), and *Base fees* (flat fees added to every permit). Each row has a label, cost, sort order, and Active toggle. Deactivating a fee hides it from the wizard without deleting historical data.
- **Permit review queue** — every non-draft application with applicant, event details, calculated fee, status, and uploaded documents. Staff can move a permit *Pending review* → *Approved / Rejected* and attach internal notes. Approving unlocks the applicant's payment panel; payment moves status to *Paid*.

HEADS UP Changing the cost of an existing fee only affects **new** applications. Submitted permits keep the calculated fee that was active when they were submitted.

ADMINS

Departments & Multi-Tenancy (Admin)

The platform is multi-tenant by department (City Hall, Fire, Parks, ...). One account can belong to several departments with different roles. The active department in the top-right header scopes the staff portal: events, venues, room queues, and approvals only show records belonging to that department. Switch departments from the same dropdown to operate elsewhere.
