

USER MANUAL

Everything you can do on the platform.

A visual, step-by-step guide for community members, city staff, and admins. Use the sidebar to jump to a section.

COMMUNITY

Platform Overview

The Community Event & Partnership Portal is the city's one-stop platform for discovering events, booking municipal rooms, applying as a performer, vendor, sponsor, or community organization, and (for city staff) running every operational side of the program.

Public home page with the four community portals

Everyone starts at the same landing page. From there, your view of the app depends on your role **and** which *department* you're currently acting in:

- **Community members** browse events, buy tickets, book rooms, and apply to programs across every department.
- **Staff** see an Event Ops sidebar scoped to their *active department* — events, venues, approvals, and box office only show records belonging to that department.
- **Dept admins & Super admins** additionally manage department settings, branding, room policies, user roles, and which platform modules are turned on.

NOTE

The platform is multi-tenant by department (City Hall, Fire, Parks, etc.). The same login can belong to several departments — see [Multi-Department Model](#).

COMMUNITY

Accounts & Logging In

One account works across every program. You can be a ticket-buyer, musician, org admin, and vendor under the same login.

Home Events Rooms Streetbeats Log in

Email

Password

Sign in

Need an account? [Sign up](#)

Login screen — sign up if you don't have an account yet

1 Sign up or log in

Click **Log in** in the top-right corner. New users can tap *Sign up* to create an account with email and password.

2 Land on your Hub

After signing in you'll arrive at your personal hub showing everything you can do.

3 Add roles as you go

Need to apply as a musician later? Just open your hub and tap *Apply as a Musician*. Same login, more capabilities.

4 Forgot your password?

On the login screen, click *Forgot password?* and enter your email. We'll send a one-time reset link — open it to choose a new password.

The screenshot shows a web application interface. At the top, there is a navigation bar with links: Home, Help Manual, and Reproduction Instruction. On the right side of the navigation bar, there are links for Events, Rooms, and Streetbeats, followed by a dark button labeled 'Log in'. The main content area is centered and contains a form titled 'Reset your password'. The form has an 'Email' label above a text input field. Below the input field is a dark button labeled 'Send reset link'. Underneath the button is a link that says 'Back to sign in'. At the bottom of the form area, there is a light gray footer text that reads: 'Password reset — enter your email and we send a secure link'.

NOTE

City staff are invited (or promoted) by an admin — see the Admin section. You'll get an email invitation to set your password.

COMMUNITY

Your Personal Hub

Your hub at /hub is mission control for everything you do with the city. It groups actions into three rows: **Apply / Add a role**, **Do something**, and **Manage your stuff**.

- Apply as musician, community org, vendor, or sponsor.
- Book a room or browse events.
- Review your tickets, room reservations, gigs, and orgs.
- Staff and admins see extra "Staff Portal" / "Admin" tiles.

Events feed with filters and sort options

1

Filter and search

Use the search box plus type, venue, and stage/room dropdowns. Date range narrows the feed to a specific window.

2

Open an event

Click any card to see full details, sessions, sponsors, and the ticket button.

3

Look for waitlist callouts

Sold-out events show a "Sold out — join the waitlist" badge directly on the card image.

COMMUNITY

Buying & Managing Tickets

From any event page, choose a ticket tier and check out. Your tickets live at /my-tickets as scannable QR codes.

1

Pick a tier and quantity

Free tickets reserve a seat. Paid tiers route through secure checkout.

2

Show the QR at the door

Staff scan it on arrival. Each seat gets its own QR for groups.

3

Join a waitlist if sold out

You'll get notified automatically if a seat opens.

Rooms page with venue, capacity, and tag filters at the top

1

Filter to the right room

Use the filter bar to narrow down by **venue**, **minimum capacity**, and **tags** (Power, Projector, TV, etc.). Filters update the list instantly and are remembered in the URL — share the link and the recipient sees the same filtered view.

2

Pick a room

Each card shows the photo, capacity, building, and address. Click for full details.

3

Choose a time

The detail page shows a live 7-day availability calendar. Booked or blocked-by-event windows are greyed out.

4

Read and accept the departmental room policy

Before the request is submitted, a modal shows the **room policy** set by the department that owns the room (rules, fees, cleanup, alcohol, etc.). You must tick "*I agree to this departmental policy*" to continue. Each department writes its own policy, so the wording changes with the room.

5

Instant-bookable rooms confirm immediately

If the room is marked **instant-bookable**, your reservation is approved on submit and you receive a confirmation email right away — no staff review needed. Otherwise it joins the *pending* queue for that department's staff to review.

HEADS UP

For non-instant rooms, submitting does **not** guarantee the booking until the owning department's staff approve it. The policy you agreed to is recorded with your request.

COMMUNITY

StreetBeats (Musicians)

StreetBeats lets approved musicians claim open busking slots at city venues. One account can hold **up to 10 separate artist profiles** — perfect for solo acts who also play in bands, or for managers handling several performers.

1 Create your first artist profile

From *My Artist Profiles* on the StreetBeats page (or *Apply as a Musician* in the Hub), fill in stage name, genre, bio, photo, and social/tip links.

2 Add more profiles if you wear multiple hats

Tap *Add another artist* to register an additional persona. Each one is reviewed and approved independently.

3 Wait for approval

Staff review each artist and notify you by email. Pending profiles can't claim slots yet.

4

Claim a slot — and pick which artist

On the StreetBeats page or *My Gigs*, hit *Claim*. If you have more than one approved profile, a dialog asks which artist is performing this gig. The slot is locked to that artist and appears on their public profile.

5

Release if your plans change

From *My Gigs*, hit *Release* on an upcoming gig to open the slot back up for other performers.

TIP

Each artist profile gets its own shareable page at `/artists/<id>` showing upcoming gigs, social links, and tip jar.

COMMUNITY

Gig Flyers & Sharing

Every claimed StreetBeats gig has its own public flyer page at `/gigs/<id>` — designed for sharing on phones, printing as a QR poster, or dropping into social posts. The "More info" button on each music card on the events page links straight to it.

Anatomy of a gig flyer

- **Date, venue, address** — the address links straight to Google Maps so listeners can navigate.
- **Stage features** — power, shade, seating, bathrooms, and backline are shown as colored chips.
- **Scan-or-tap QR grid** — each social/tip link becomes a QR code that doubles as a tap target on mobile.
- **One-tap share row** — WhatsApp, Facebook, X, Instagram (copy + open), and copy-link.

TIP

Performers: open your flyer, hit *Copy*, and paste into your own stories. The page renders rich Open Graph previews so it looks great in iMessage, WhatsApp, and Facebook.

BUSINESS EMAIL

PASSWORD

[Access My Dashboard](#)

[Need an account? Sign Up](#)

Vendor portal — sign in to manage your booth

1

Sign in to the vendor portal

Go to `/vendor` and create an account if needed.

2

Apply for events open to vendors

Pick an event, choose a booth tier, and submit your application with your business profile.

3

Tell us about your sales & licensing

The application now asks four extra questions used by staff to triage your booth:

- **Will you be selling items?** If yes, describe the products or services (menu, merchandise, services offered, price range).
- **Are you licensed to do business and sell items?** If yes, upload one or more proofs (sales-tax permit, health/cottage-food permit, business license, food handler cards, etc.) — multi-file upload is supported.
- **Special requirements** — electrical needs, water access, vehicle drop-off, allergens, accessibility, anything staff should know before assigning your spot.

4

Wait for staff approval

City staff review your application and supporting documents before any payment is collected.

5

Review the contract and pay

Once approved, an in-app payment panel opens showing your tier, the exact amount due, and the full **Vendor Agreement** (event rules, cancellation/refund policy, indemnification, and insurance requirements). You must tick *"I have read and agree to the contract terms"* before the **Submit Payment** button enables. Card details are captured on the same screen and charged on submit; you'll receive a confirmation with a transaction reference and invoice number.

6

Manage booth placement

After payment clears, your booth assignment and event-day logistics appear in the same vendor dashboard.

TIP

Uploaded permits are stored privately in the vendor-permits bucket and are only visible to you and the reviewing staff.

COMMUNITY

Becoming a Sponsor

Browse current partners at </sponsors> and click *Become a Sponsor* to start a conversation about tiers and placement. Sponsorship applications are submitted through the same </vendor> portal — pick the event, choose a sponsorship tier (which controls logo placement, mentions, and benefits), and submit for staff review.

After approval, the portal opens the same payment + contract panel used for vendors. You'll see your tier and price, the full **Sponsorship Agreement**, and must check *"I have read and agree to the contract terms"* to authorize the charge. Payment is processed in-app and a confirmation with transaction reference and invoice number is issued immediately — your logo then appears on the event page and flyers.

COMMUNITY

Special Event Permits

Anyone planning a public event that needs city approval (parades, festivals, runs, block parties, etc.) applies online at </events/permits/apply>. The form is a guided 5-step wizard with dynamic pricing and in-app payment.

1

Applicant & Event Basics

Primary contact, organization, event name, estimated participants, and event type. The event type is pulled from the city's current fee schedule and contributes to your total.

2

Dates, Times & Logistics

Setup, main, and teardown windows; whether you'll serve alcohol (with TABC license number), have food vendors, need electrical service, or are including a parade route.

3

Operations & Safety

Narrative answers for traffic control, litter control, and how you'll notify nearby residents and businesses.

4

Document Uploads

Required: certificate of insurance, site plan, and traffic management plan. Files are stored privately in the permit-docs bucket and are only visible to you and staff reviewers.

5

Fees, Signature & Payment

The wizard adds the active base fee + your chosen route/trail option fee in real time. After typing your name to certify, the same USAePay checkout used for vendor booths opens. On a successful charge the permit is marked **paid** and sent to the staff review queue.

TIP

Hit **Save Draft** at any time. Drafts are kept in your account and can be resumed from /my-permits or the *My Permits* card on your Hub.

COMMUNITY

My Permits

The /my-permits page lists every Special Event Permit you've started or submitted, along with its current status:

- **Draft** — saved but not yet submitted. Click *Resume* to reopen the wizard or the trash icon to delete.
- **Pending review** — sent to staff; you can still view your answers and the calculated fee.
- **Approved** — staff have approved; the wizard will let you complete payment.

- **Paid** — payment captured; the city has your certificate on file.
- **Rejected** — see staff notes for why; start a new application if needed.

NOTE

You can also reach this page from *My Permits* in the "Manage your stuff" section of your Hub.

Staff Master Schedule with the Event Ops sidebar

- **Events** — Master Schedule: create, edit, and CSV-import events.
- **Venues & Stages** — manage locations, stages, and rooms.
- **Box Office** — attendees, check-ins, and ticket sales.
- **Vendors / Sponsors** — review applications and assign booths.
- **Community Music / Orgs / Events** — approve and schedule.
- **Room Reservations** — approve, decline, or reschedule requests.
- **Classes** — manage the class catalog and registrations.
- **Social Command** — multi-channel social publishing and connections.
- **Platform Settings** — your profile and operational settings.

NOTE

Special Event Permits are reviewed by admins under *Admin → Permit settings*; see the admin section for the permit queue.

STAFF

Managing an Event

Click any event from the Master Schedule to open its dashboard. Each event has tabs for Overview, Box Office, Marketing, Ticketing, Vendors, Volunteers, Reports, Attendees, Waitlist, Scanner, and Settings.

1

Create the event

Use the **New Event** form on the Master Schedule. Required fields: title, type, room/stage, start time.

2

Add tickets and tiers

On the Ticketing tab, define tiers, capacity, and pricing.

3

Manage attendees and waitlist

Live counts update as people buy. Move waitlisters into open seats with one click.

4

Run the door

Open the Scanner tab on a tablet at the entrance to scan ticket QRs.

TIP

Use **Batch CSV** on the Master Schedule to export selected events, edit in a spreadsheet, and re-upload changes.

STAFF

Box Office & Attendees

The Box Office page (/staff/attendees) is the cross-event view of every ticket holder. Filter by event, status, or search by name and email.

- Issue comp tickets, refund, or reassign seats.
- Resend QR codes by email.
- Check arrival status against scans.

**STAFF**

Approvals (Music, Orgs, Vendors, Rooms)

Each application type lives in its own sidebar page. They share the same review pattern: see the queue, open a submission, then approve, reject, or request changes.

1

Open the queue

Pick Community Music, Community Orgs, Vendors, Sponsors, or Room Reservations from the sidebar.

2

Review the submission

Applicant info, attachments, and history appear in the right pane.

3

Decide

Approve to publish / activate, decline with an optional note (sent by email), or leave a comment and come back later.

**ADMIN**

Managing Staff Accounts

EVENT OPS

Manage staff

Manage permissions →

Invite staff and admins, change roles, or remove accounts.

Invite a new user

Email

Role

Staff

Send invite

Promote existing user

Grant a role to someone who already has an account — no invite email is sent.

Email

Role

Staff

Grant role

Bulk invite

Paste or type emails separated by commas or newlines. Everyone is invited as **staff**. Promote individuals to admin using the toggles below.

Invite all as staff

Admin > Manage staff: invite, promote, or bulk-invite

Admins manage staff from `/staff/admin`. You can:

- **Invite a new user** — sends an email with sign-up link and assigns the chosen role (staff or admin).
- **Promote existing user** — grant staff or admin to someone who already has a community account. No email is sent.
- **Bulk invite** — paste a list of emails to onboard multiple staff at once.

HEADS UP

Be careful with the **admin** role — admins can change permissions, modules, and other admins.

ADMIN

Granular Permissions

Open *Manage permissions* from the admin page header. Each staff member has a row; click to open a drawer with two tabs:

- **Global** — checkbox grid of every permission (sidebar pages and event-dashboard tabs). What's checked applies to all events.
- **Per-event** — pick an event and override permissions with grant, revoke, or inherit.

NOTE

Admins implicitly have every permission. Plain staff users get only what you grant. Permission changes take effect on the user's next page load.

ADMIN

Platform Modules & Settings

Turn entire features on or off across the platform from the settings/modules area. Every major feature has its own toggle so you can phase rollouts or pilot a single program. Current modules:

- **Events** — the public events directory & ticketing.
- **Venues & Stages** — venue/stage directory and editor.
- **Box Office** — attendee management and check-in.
- **Vendors / Sponsors** — applications, contracts, payments.
- **StreetBeats** — musician roster and gig claiming.
- **Community Orgs & Events** — HOA / nonprofit submissions.
- **Room Reservations** — booking flow and instant-book toggle.
- **Classes** — class catalog and registration.
- **Social Command** — multi-channel social publishing.
- **Special Event Permits** — the 5-step permit wizard, *My Permits*, and the staff review queue.

NOTE

Disabling a module hides it from public nav, the Hub, and the staff sidebar. Existing data is preserved — modules can be re-enabled at any time without data loss.

**ADMIN**

Permit Settings & Fee Schedule

The *Permit settings* link on `/staff/admin` opens the Special Event Permit configuration page at `/staff/admin/permits`. Admins control two things here:

- **Fee schedule** — manage three categories of configurations:
 - *Event types* — the radio choices applicants pick in step 1 (e.g., "5K Run", "Block Party", "Parade").
 - *Route / Trail fees* — the route or trail options shown in step 5 (e.g., "River Walk Trail — \$150").
 - *Base fees* — flat fees added to every permit (sum of all active base fees, e.g., a \$50 application fee).

Each row has a label, cost, sort order, and an Active toggle. Deactivating a fee hides it from the public wizard without deleting historical data.

- **Permit review queue** — every non-draft application appears here with applicant, event details, calculated fee, status, and uploaded documents. Staff can mark a permit *Pending review* → *Approved* / *Rejected*, and attach internal notes. Approving a permit unlocks the applicant's payment panel; payment moves the status to *Paid*.

HEADS UP

Changing the cost of an existing fee only affects **new** applications. Submitted permits keep the calculated fee that was active when they were submitted.

**ADMIN**

Branding Engine

The Branding engine at `/staff/admin/branding` is the single source of truth for how the platform looks. It controls the full design-token set — not just two colors — and powers a live preview, accessibility checks, a logo/favicon pipeline, and a Draft → Publish workflow with version history.

- **Full token system** — primary, secondary, accent, surface, foreground, border, radius, typography pair, and more. Edits apply instantly in the live preview pane.
- **Accessibility checks** — every color pair is scored against WCAG contrast. Failing combinations are flagged before you can publish.
- **Logo variants & favicons** — upload a master logo; the favicon pipeline auto-generates the 32 px, 180 px (Apple touch), and 512 px (PWA) versions in a single click.
- **Curated font picker** — choose from a curated set of heading/body pairs with previews; the chosen pair flows into CSS variables consumed by every page.
- **Presets, versions & drafts** — save reusable presets, work in a draft without affecting the live site, then publish. Every publish snapshots the previous state so you can roll back from *Version history*.

NOTE

Branding tokens cascade: global → tenant → department. A tenant or department can override any subset of tokens; everything else inherits from the global theme.

ADMIN

Tenants (Multi-Site)

Tenants let the platform serve multiple branded sites from one installation. Manage them at `/staff/admin/tenants`.

- **Create a tenant** with a slug, display name, and optional custom host (e.g. `events.cityname.gov`).
- **Tenant-level branding** — each tenant has its own token overrides, logos, and favicon, layered on top of the global design system.
- **Resolution** — when a request comes in, the platform matches by host first, then by `/t/<slug>path`, and falls back to the global default.

TIP

Tenants pair with the Home Page editor: each tenant can publish its own home page that automatically replaces the global one for visitors on that host.

**ADMIN**

No-Code Home Page Editor

The landing page at / is fully editable — no code required. Open /staff/admin/home for a side-by-side editor with a live preview on the right.

- **Hero** — badge, title, subtitle, sign-in copy, and a list of secondary CTA buttons (each can be gated to a specific module).
- **Sections** — drag-and-drop ordered blocks: *portal cards*, *explainer cards*, *rich text*, *image banner* (with built-in uploader), and *CTA band*. Cards pick from a curated icon set and a fixed color-theme palette.
- **Footer** — tagline, body copy, and copyright line.
- **Editing scope** — toggle between the global default and any tenant. Tenant rows seed from the global one on first edit, so you only customize what's different.
- **Draft & Publish** — save drafts while you iterate; publishing snapshots the previous live version into history so you can revert with one click.

HEADS UP

Items inside cards can declare a `requires_module` — if that module is disabled, the card is hidden automatically. Use this to safely advertise features still rolling out.

**COMMUNITY**

Departments & Active Context

The platform is organized into **departments** (City Hall, Fire, Parks & Rec, Library, etc.). Every event, venue, room, vendor application, and reservation belongs to

exactly one department. This keeps each team's queue, calendar, and box office focused on their own work — while still letting the public see and book across the whole city from one site.

A single staff login can belong to **multiple** departments (for example, the city clerk who supports both City Hall and the Library). When that's the case, a department picker appears in the top-right of the site header. Whatever you pick is your **Active Department** — every staff page, sidebar count, and "new event / new booking" form fills in that department until you switch.

TIP

Staff: glance at the badge in the Event Ops sidebar to confirm which department you're acting in. Switch in the header before creating anything important.

**COMMUNITY**

Department Hub Pages

Each department has a public landing page at `/departments/<id>` that shows its logo, name, and a curated grid of **upcoming events** and **bookable rooms** scoped to that department only.

- Great for sharing — link the Fire Department's page to send people straight to their open houses and training rooms.
- Theming (colors, logo) on the hub matches the department's brand, so it doesn't feel like a generic listing.

- Public visitors can click straight from the hub into ticketing or room booking, with the department's policy applied automatically.

COMMUNITY

Department Branding & Theming

When you're viewing a department's hub — or when staff have a department selected as active — the site automatically adopts that department's **brand colors**. Behind the scenes, each department stores a small block of CSS variables (primary color, accent, etc.) that override the default theme globally for the current view.

NOTE

Departments can swap their look without code changes. Admins paste updated CSS variables in the department editor and the new theme applies on the next page load.

STAFF

Working in Your Active Department

Almost every page in the Staff Portal is filtered by your **active department**:

- **Master Schedule** only lists events whose *department_id* matches.
- **Venues & Stages** shows only the rooms/venues owned by that department.
- **Box Office & Attendees** only show tickets for that department's events.
- **Approvals** (vendors, sponsors, room reservations) only show requests for things this department owns.
- **New Event** auto-fills the department, and the *Staff Owner* dropdown only lists users who belong to that same department.

TIP

If you swap departments mid-task, your forms and lists update immediately. The active department is shown as a badge in the Event Ops sidebar, with a count of how many departments you belong to.

STAFF

Cross-Department Room Requests

Staff frequently need to book a room that belongs to *another* department (e.g., the Fire Dept. wants a City Hall conference room). The `/staff/room-reservations` page now has two tabs to keep this clear:

Inbound

Bookings against rooms **your** department owns, including requests from other departments. Approve / decline here.

Outbound

Requests **your** department has sent out to other departments. Read-only — track status while you wait.

Inbound vs. Outbound — two sides of every cross-department booking

1

Submit a request

Use the *New reservation* dialog. If the room is owned by a different department, a banner warns you it's a cross-department request; your active department is stamped as the requester.

2

Track it under Outbound

Your request appears in your **Outbound** tab with a "to {owning department}" badge. You'll see status updates (pending → approved / declined) as the other team reviews it.

3

Review incoming requests under Inbound

When another department asks for one of *your* rooms, it shows up in your **Inbound** tab with a "from {requester department}" badge. Approve or decline — only the inbound side shows action buttons.

NOTE

Instant-bookable rooms still apply: a public user (or staff) booking an instant room is auto-approved regardless of department.

**ADMIN**

Managing Departments

Super admins manage departments from `/staff/admin/departments`. The page has a datatable of every department and full CRUD via a dialog editor.

- **Department Name** — shown on the public hub, in the staff sidebar badge, and on cross-department badges.
- **Logo upload** — stored in the department-logos bucket and rendered on the department hub and header.
- **Room Policy Text** — the agreement the public must accept before booking any room owned by this department.
- **Brand CSS** — a small JSON block of CSS variables (e.g. `{ "--primary": "262 83% 58%" }`) applied globally when this department is active or being viewed.

HEADS UP

Deleting a department is destructive: events, rooms, and approvals tied to it lose their owner. Re-assign first, then delete.

**ADMIN**

Assigning Users to Departments

Open *Manage permissions* from the admin page and pick a user. The drawer now has a **Departments** tab where you can attach the user to one or more departments and grant them either:

- **staff** — works inside that department's queues (events, approvals, box office) with whatever global/per-event permissions you've granted.
- **dept_admin** — same as staff plus can edit that department's branding, room policy, and assignments.

TIP

Users with multiple memberships get the department picker in the header — see [Departments & Active Context](#).

**ADMIN**

Program Guidebook Generator

Admins can compile every approved event, StreetBeats performance, and class within a date range into a print-ready PDF program guide, with sponsor ads automatically interleaved. Open it from *Admin* → *Generate Guidebook*.

Quick generate

1

Pick a date range

Set a start and end date. Click *Preview counts* to see how many events, gigs, classes, and sponsor ads will land in the PDF.

2

Generate PDF

Click *Generate PDF* for an automatic layout. The browser downloads `program-guide-{start}_to_{end}.pdf`.

Customize with the Layout Builder

Need finer control? Click *Open in Layout Builder* to enter the Guidebook Canvas, where every event, gig, class, and ad is a drag-and-drop card.

- **Drag** any row to reorder it within the print edition.
- **Hide / show** items that don't fit the visual flow.
- **Edit print copy** to override a title or description just for this edition — the underlying database record is not touched.
- **Reframe the card image** — click and drag on any card's image to set its focal point. The PDF crops around that point so faces and signage stay in frame.

- **Insert ad slot** drops a sponsor's bought ad block exactly between any two listings.
- Click **Export PDF** to render the final layout.

Guidebook sponsors (no event required)

You don't have to attach a sponsor to an event to get them into the guidebook. On the *Generate Guidebook* page, scroll to **Guidebook sponsors** and fill in the form:

1 Enter company info

Company name is required. Add contact name, email, logo URL, and ad copy as available.

2 Click Add guidebook sponsor

The sponsor is created as *standalone* (no event link) on the **Guidebook Ad Space** tier and immediately marked *approved*. The tier is auto-created the first time it's needed.

3 They appear in the next PDF

Standalone and event-attached guidebook sponsors are pooled together and rotated through the cover logo, full-page ad, half-page slots, and footer credits.

TIP

Sponsors who applied through the public sponsor portal and chose the Guidebook tier still flow in automatically — you only need the form above for sponsors you want to add manually without an event.

ADMIN

Social Media Command Center

The Social Media Command Center turns a monthly calendar into a drag-and-drop publishing tool for Facebook Pages, Instagram Business accounts, and LinkedIn — scoped to whichever department is active in the top-left switcher. Open it from *Event Ops sidebar* → *Social Command*.

Permission

Access is gated by the new **Social Command Center** staff permission (`page.social_command`). Grant it under *Admin* → *Permissions*. Existing staff and admins received it automatically when the feature shipped.

One-time platform setup (admin)

Before any department can connect accounts, an admin pastes OAuth credentials at *Admin* → *Social integrations*:

1 Create a Meta app

At developers.facebook.com create a Business app. Add the *Facebook Login* and *Instagram Graph API* products. Copy the App ID and App Secret into the Meta card on the integrations page, then paste the *Redirect URI* shown there into Meta's allowed redirect URL list.

2 Create a LinkedIn app

At linkedin.com/developers create an app, enable *Sign In with LinkedIn using OpenID Connect*, *Share on LinkedIn*, and any organization products you have access to. Copy the Client ID and Secret into the LinkedIn card and paste the redirect URL into the Auth tab.

3 Hit Save on each card

Credentials live in `social_integration_secrets` and are only readable by admins. Until both cards are saved, the per-department Connect buttons will show "{platform} OAuth is not configured".

Per-department: connect accounts

Each department connects its own accounts so cross-department staff can't accidentally post to the wrong page. From the Social Command page, click *Connect* (top-right) or open *Social* → *Connections*:

1 Connect Meta

One sign-in connects every Facebook Page the signed-in user administers plus any Instagram Business accounts linked to those Pages.

2 Connect LinkedIn

Posts go out as the connecting member. Use a service account if you want a stable author across staff turnover.

3 Disconnect anytime

The trash icon next to a connected account immediately revokes posting from this app — tokens stay in the platform's account settings until you fully revoke them there.

Schedule a post

1 Drag an event onto a day

The composer opens pre-filled with a draft caption from the event title, date, and speaker. Or click an empty day to compose from scratch.

2 Pick channels

Only platforms with connected accounts will actually publish. Instagram requires an image URL. X stays in the UI as a manual copy/paste workflow because X's automated posting API is paid-tier only and not wired up.

3

Schedule

Posts within 1 minute of "now" publish immediately. Future posts land in the calendar with status *scheduled*; results are recorded per platform on `social_posts.results`.

NOTE

Tokens for connected accounts never leave the server — the client only sees account names and connection status. Publishing happens entirely through TanStack server functions using each department's stored access token.

That's the whole platform. Bookmark this page — it updates as new features ship.
