

Community Event & Partnership Portal

USER MANUAL

Everything you can do on the platform. A visual, step-by-step guide for community members, city staff, and administrators.

Getting Started

Platform Overview

The Community Event & Partnership Portal is the city's one-stop platform for discovering events, booking municipal rooms, applying as a performer, vendor, sponsor, or community organization, and (for city staff) running every operational side of the program.

Everyone starts at the same landing page. From there, your view of the app depends on your role:

- **Community members** browse events, buy tickets, book rooms, and apply to programs.
- **Staff** get an Event Ops sidebar to manage events, attendees, vendors, music, and reservations.
- **Admins** additionally manage user roles, granular permissions, and which platform modules are turned on.

Accounts & Logging In

One account works across every program. You can be a ticket-buyer, musician, org admin, and vendor under the same login.

1 Sign up or log in

Click **Log in** in the top-right corner. New users can tap *Sign up* to create an account with email and password.

2 Land on your Hub

After signing in you'll arrive at your personal hub showing everything you can do.

3 Add roles as you go

Need to apply as a musician later? Just open your hub and tap *Apply as a Musician*. Same login, more capabilities.

Note: City staff are invited (or promoted) by an admin — see the Admin section. You'll get an email invitation to set your password.

Your Personal Hub

Your hub at `/hub` is mission control for everything you do with the city. It groups actions into three rows: **Apply / Add a role**, **Do something**, and **Manage your stuff**.

- Apply as musician, community org, vendor, or sponsor.

- Book a room or browse events.
- Review your tickets, room reservations, gigs, and orgs.
- Staff and admins see extra "Staff Portal" / "Admin" tiles.

For Community Members

Browsing Events

The `/events` feed combines city-run events, community gatherings, and live music.

1 Filter and search

Use the search box plus type, venue, and stage/room dropdowns. Date range narrows the feed to a specific window.

2 Open an event

Click any card to see full details, sessions, sponsors, and the ticket button.

3 Look for waitlist callouts

Sold-out events show a "Sold out — join the waitlist" badge directly on the card image.

Buying & Managing Tickets

From any event page, choose a ticket tier and check out. Your tickets live at `/my-tickets` as scannable QR codes.

1 Pick a tier and quantity

Free tickets reserve a seat. Paid tiers route through secure checkout.

2 Show the QR at the door

Staff scan it on arrival. Each seat gets its own QR for groups.

3 Join a waitlist if sold out

You'll get notified automatically if a seat opens.

Booking a Room

1 Pick a room

Browse [/rooms](#). Each card shows capacity, building, and address.

2 Choose a time

The detail page shows a live 7-day availability calendar. Booked or blocked-by-event windows are greyed out.

3 Submit your request

Sign in if prompted. Staff review and email you a confirmation.

Heads up: Submitting a request does **not** guarantee the booking until staff approve it.

StreetBeats (Musicians)

StreetBeats lets approved musicians claim open busking slots at city venues.

1 Apply to perform

Click *Apply to Perform* and tell us about your act.

2 Wait for approval

Staff review your application and notify you by email.

3 Claim slots

Once approved, head to *My Gigs* in your hub to claim available slots.

Community Organizations

HOAs, nonprofits, churches, and schools can register as a Community Org and submit events for the city calendar.

1 Register your org

Tap *Register Your Org*. You can have multiple orgs under one account.

2 Submit events

Once approved, submit events from *My Organizations*. Staff approve before they go live.

Vendor Applications

1 Sign in to the vendor portal

Go to `/vendor` and create an account if needed.

2 Apply for events open to vendors

Pick an event and submit your booth application.

3 Track status and invoices

Once approved, you'll see booth placement and payment requests.

Becoming a Sponsor

Browse current partners at `/sponsors` and click *Become a Sponsor* to start a conversation about tiers and placement.

Exploring Venues

The `/venues` page lists every location, stage, and room in the network with addresses and capacities.

For Staff

Staff Portal Overview

The staff portal at `/staff` has a dark sidebar (Event Ops) listing every operational area you can access. Items only appear if you have permission for them.

- **Events** — Master Schedule: create, edit, and CSV-import events.
- **Venues & Stages** — manage locations, stages, and rooms.
- **Box Office** — attendees, check-ins, and ticket sales.
- **Vendors / Sponsors** — review applications and assign booths.
- **Community Music / Orgs / Events** — approve and schedule.
- **Room Reservations** — approve, decline, or reschedule requests.
- **Platform Settings** — your profile and operational settings.

Managing an Event

Click any event from the Master Schedule to open its dashboard. Each event has tabs for Overview, Box Office, Marketing, Ticketing, Vendors, Volunteers, Reports, Attendees, Waitlist, Scanner, and Settings.

1 Create the event

Use the **New Event** form on the Master Schedule. Required fields: title, type, room/stage, start time.

2 Add tickets and tiers

On the Ticketing tab, define tiers, capacity, and pricing.

3 Manage attendees and waitlist

Live counts update as people buy. Move waitlisters into open seats with one click.

4 Run the door

Open the Scanner tab on a tablet at the entrance to scan ticket QRs.

Tip: Use **Batch CSV** on the Master Schedule to export selected events, edit in a spreadsheet, and re-upload changes.

Box Office & Attendees

The Box Office page (</staff/attendees>) is the cross-event view of every ticket holder. Filter by event, status, or search by name and email.

- Issue comp tickets, refund, or reassign seats.
- Resend QR codes by email.
- Check arrival status against scans.

Approvals (Music, Orgs, Vendors, Rooms)

Each application type lives in its own sidebar page. They share the same review pattern: see the queue, open a submission, then approve, reject, or request changes.

1 Open the queue

Pick Community Music, Community Orgs, Vendors, Sponsors, or Room Reservations from the sidebar.

2 Review the submission

Applicant info, attachments, and history appear in the right pane.

3 Decide

Approve to publish / activate, decline with an optional note (sent by email), or leave a comment and come back later.

For Admins

Managing Staff Accounts

Admins manage staff from `/staff/admin`. You can:

- **Invite a new user** — sends an email with sign-up link and assigns the chosen role (staff or admin).
- **Promote existing user** — grant staff or admin to someone who already has a community account. No email is sent.
- **Bulk invite** — paste a list of emails to onboard multiple staff at once.

Heads up: Be careful with the **admin** role — admins can change permissions, modules, and other admins.

Granular Permissions

Open *Manage permissions* from the admin page header. Each staff member has a row; click to open a drawer with two tabs:

- **Global** — checkbox grid of every permission (sidebar pages and event-dashboard tabs). What's checked applies to all events.
- **Per-event** — pick an event and override permissions with grant, revoke, or inherit.

Note: Admins implicitly have every permission. Plain staff users get only what you grant. Permission changes take effect on the user's next page load.

Platform Modules & Settings

Turn entire features on or off across the platform from the settings/modules area. Modules include StreetBeats, Community Orgs, Room Reservations, and Vendors / Sponsors.

- Disabled modules disappear from public nav, the hub, and the staff sidebar.
- Existing data is preserved — modules can be re-enabled at any time.
- Use this to phase rollouts or pilot a single program.

That's the whole platform. Bookmark this page — it updates as new features ship.
